

Benefit for the "Save The Margaret" Fund

The Margaret, in her 107th year of life, was a victim of the wrath of Hurricane Irene. On August 27th, 2011, Irene broke the anchor chain of the Margaret, causing her to be driven aground during the record height of the storm surge. As the storm surge receded, Margaret was left stranded about fifty feet from the shoreline at the mouth of Bath Creek in North Carolina. To slide the Margaret back into water is an intricate and expensive job. The current estimate is \$25,000 to save her for future generations to enjoy. Any donations to help free her will help, as her owner of 40+ years, Capt. David "Bucko" Edwards, now in his 70's, does not have the resources to finance her freedom.
